

SUNNY RAJ

Backend Engineer | Full Stack Engineer | AI Engineer (Entry Level)

Surajgaraha, Lakhisarai, Bihar 811106 (Open to Relocation) | sunnyraj01000@gmail.com | +91-8002519243 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Backend-focused Full Stack Engineer specializing in Node.js, Express.js, and MongoDB, with hands-on production experience building scalable RESTful APIs, secure authentication (JWT, RBAC), and real-time systems using Socket.io and WebSockets. Skilled in AI Engineering with LangChain, RAG pipelines, embeddings, and LLM APIs for building intelligent, context-aware applications. Strong foundation in Data Structures, Algorithms, and System Design, with a track record of shipping end-to-end features from database design through cloud deployment.

TECHNICAL SKILLS

Languages: C++, JavaScript, Python

Backend & APIs: Node.js, Express.js, RESTful API Development, JWT Authentication, RBAC, Socket.io, WebSockets, System Design

Frontend: React.js, HTML5, CSS3, Bootstrap

Databases: MongoDB, MySQL, Database Design

AI / LLM Engineering: LangChain, Retrieval-Augmented Generation (RAG), Embeddings, Vector Databases, OpenAI APIs, LLM Integration

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Tools & Cloud: Git, GitHub, Postman, Cloud Deployment (Render, Railway), Leaflet.js

PROJECTS

[AI Document Q&A System \(RAG-Based LLM Application\)](#) | [Node.js](#), [React](#), [RAG](#), [Embeddings](#), [Vector Database](#), [LLM APIs](#) [\[LIVE\]](#)

- Architected a Retrieval-Augmented Generation pipeline with document ingestion, chunking, and embedding generation, improving **semantic search accuracy by 40% over keyword-based search**.
- Built modular REST APIs for document upload, indexing, and real-time Q&A, enabling sub-2-second query responses across multi-document datasets.

[AI Admin Query Assistant](#) | [LangChain](#), [OpenAI](#), [Python](#), [Streamlit](#), [RBAC](#) [\[LIVE\]](#)

- Developed an AI-powered admin panel enabling natural-language querying over student and quiz datasets, cutting manual SQL query time by an estimated 60%.
- Implemented role-based access **control (RBAC) with grade-, class-, and region-level data filtering**, and built an interactive Streamlit dashboard with query history and dynamic analytics.

[Real-Time Chat Application](#) | [React](#), [Node.js](#), [Express.js](#), [Socket.io](#), [Bootstrap](#) [\[LIVE\]](#)

- Built a JWT-secured real-time messaging platform supporting private and **group chat with live presence**, handling 500+ concurrent WebSocket connections.
- Designed normalized MongoDB schemas for persistent chat history and user management, reducing average query response time by 35%.

[Full-Stack E-Commerce Platform](#) | [Node.js](#), [React](#), [Context API](#), [MongoDB](#), [JWT](#), [Bootstrap](#) [\[LIVE\]](#)

- Engineered a scalable **MERN-based e-commerce platform** featuring JWT authentication, protected routes, product catalog, intelligent search, multi-level filtering, sorting, shopping cart, wishlist, and responsive UI for an end-to-end online shopping experience.
- Designed and implemented **RESTful APIs** for authentication, product management, cart, wishlist, and user operations using **Node.js**, **Express.js**, and **MongoDB**, while leveraging **React Context API** for predictable global state management and seamless client-server synchronization.

EDUCATION

B.Tech in Computer Science & Engineering — GIET University, Gunupur, Odisha

2021 – 2025 | CGPA: 7.32 / 10

12th (PCM) — Bihar Board of Open Schooling and Examination (BBOSE), 2021 | 70%

10th — Central Board of Secondary Education (CBSE), 2016 | CGPA: 8.2 / 10

EXPERIENCE & TRAINING

- Software Development Intern at Dumroo.ai | Dec 2025 -Mar 2026
- Additional Training: Flutter, React, Java, Spring Boot (Tech Mahindra COE)
- Web Development Internship, Edu-versity | Apr 2023 – Jun 2023
- Data Structures & Algorithms – Supreme 2.0, Love Babbar (CodeHelp, Adobe Systems)
